An other great one

By Me

This was an other great addition to the Wolves' Heat trilogy. I love the world that the author has built. I would have like to know more about the whole fate/diviners aspect. I still am kind of confused. But that confusion won't stop me from reading more from this author. I like that a whole world is built and the sex is great and the characters are explained. With so many bad m/m books out there it is nice to read a fun fantasy novel, which is well written. And the price is nice also. This author is an auto buy for me.

Different than the last

By Such promise

I thought the book pushed me out of my comfort zone. There were some sex scenes that definitely walked the lines of consent. Once that part was cleared up the rest of the book held great characters and a plot that never got stale.

Dramatic

By Kindle Customer

after all the drama of the first two books this one is just as great. I liked the way the story played out with brenden getting his head screwed on straight at the end.
