"Fundamentals of Investments" was written to: focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context; offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world; and, organize topics in a way that makes them easy to apply - whether to a portfolio simulation or to real life - and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments - stocks, bonds, options, and futures - focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

great book

By east coaster

I have looked for a concise text with clear explanations. The book does a great job. I am not in the finance world, but needed an intro text. This did the job well.
