A "screenwriting book-formatting" which like the name is says
By Ricardo
There's two kinds of books, you need to get. A "screenwriting book-formatting" which like the name is says; learn the proper format to write an screenplay. And the second is "screenwriting book-storytelling" which is this book. I picked a sample of this book at my local library, and it covers a profound depth of psychology on how to assemble your characters, and storyline. When I say "assemble", I mean to create the brain and personality of your characters in your story, to make them more appealing, related to our own common world and situation, and something very important; to understand their purpose to do whatever action do in the story. When I say about storyline, it reveals a formula, more than a formula-a pattern, on how the biggest blockbuster films become that: the biggest hit on the screen.

All these film: gladiator, Pearl Harbor, titanic, Star Wars, Harry Potter, Lord of the rings, karate kid. All they share this common formula which is revealed in this book.
And I immediately i bought this book and use it not only in my low budget films I produce. You can apply this book Even for novels, and short stories. You will never going to regret this book.

great coverage, inspiring
By customer
This book is not only inspirational for screenwriters, helping them understand how various psychological

theories actually work and could be applied to creating characters, but it is a very good, succinct overview of psychological theories in general. Reading this helps screenwriters to ground their work in how people actually function.

A must-have for any story writer
By Jeffrey L. Armbruster
A lot of food for thought here. The book describes various psychological theories (Freud, May, Jung) and applies them to creating characters and story. Good book. Why aren't there more books like this? Stories are about human behavior, human feelings; i.e.: psychology. Sheesh! Tons of books about format and structure, little on story content, character motivation.

I also recommend "Creating Chracters", by Howard Lauther.
