In a delicious slice of sci-fi whimsy that sits cleverly alongside Verne's original tale, Phileas Fogg's epic global journey is not the product of a daft wager but, in fact, a covert mission to chase down the elusive Captain Nemo - who is none other than Professor Moriarty.

A secret alien war has raged on Earth for years and is about to culminate in this epic race.

A novel in the Wold Newton universe, in which characters such as Sherlock Holmes, Flash Gordon, Doc Savage, James Bond and Jack the Ripper are all mysteriously connected.

Clarifies many odd points in Verne's story!

By Kendal B. Hunter

This book isn't quite a parallel novel to "80 Days;" it is more like a double take of that book. Farmer extends his "World Newton Family" in Verne's classic, and makes Fogg's mission an intergalactic battle against Captain Nemo, who Farmer believes is Professor James Moriarty of the Sherlock stories.

Farmer, one of the greatest student of "Pop Pulp" culture manages to combine the heroes of the popular

literary world in to a coherent world system. In Farmer's world, Tarzan is related to Sherlock Holmes, and Doc Savage is the grandson of Jack London's Wolf Larsen. In a certain sense, we all do this on our own. For example, what would have happened in "A Tale of Two Cities" if the Scarlet Pimpernel had saved Sydney Carton from the guillotine? Farmer's "World Newton Family" functions along these lines. He has even made two rough genealogical charts showing who is related to whom.

As I read this book, two things struck me. First, the approach of this book reminds me of Crispin H. Glover's attempts to read new stories into old classics. Secondly, Farmer clarifies many of the odd things about "80 days." How does Fogg know everything about all of the odd lands. How does he know all the schedules of every boat and train everywhere in the world. Why would a man who lived such a controlled and regimented life on a sudden take a trip around the world just to win a bet?

I recommend that you read Verne's book first, and Farmer's second. I didn't do this, and am still regretting it. I kept on reading Farmer's book into Verne's story, and couldn't enjoy Verne's spell.

Great book, awesome extras!

By PS

I've just received my Titan edition of The Other Log of Phileas Fogg!

Over the last three decades I must have read this novel three or four times and each time I have reverted to my Tor version from 1982. Being a big fan of the source novel I was delighted and fascinated with how my favourite author wound his own version of events in with the Verne classic. Rereading the book only added to the enjoyment as new depths of understanding and revelation became apparent to me. Philip José Farmer did a wonderful job with this novel and his love and appreciation of Around the World in 80 Days shines through the whole book.

I love collecting books, especially Farmer books, so of course this Titan reprint would be on my wish list. But what really sold it for me were the enticing new 'extras' promised and, boy, do they live up to the promise! Win Scott Eckert's afterword 'Only a Coincidence' has the sub title "Phileas Fogg, Philip José Farmer, and the World Newton Family." What follows is a gripping, fascinating, and erudite essay into the whole World Newton legend. These 23 pages are packed with facts, revelations, and interpretations that are as gripping as any piece of prose. Anyone wanting a full and detailed exposure to the World Newton Family need not look any further. I particularly love the Fogg-Farmer family tree and if your eyes don't widen suddenly as you take it in then you have better reserve than me!

Then follows a 10 page chronology, again by Eckert. Another fascinating read that distils, with absolute clarity, the major events linked with The Other Log of Phileas Fogg.

So, if you already own this book and have no intention of rereading it (though you'll miss revisiting an old friend!) you really should consider buying this edition for the extras. They're worth every penny of the cover price. And if you're new to all things World Newton you couldn't wish for a better introduction. Thank you, Titan, for this wonderful reprint, and thank you Mr Eckert for the effort and thought you put into such wonderful extra material for this book.

Neat Little Book

By pj

In retrospect it reminds me a lot of Kim Newman's Anno Dracula, both in terms of concept and style. Enough to make me wonder if Newman wasn't inspired by it. The book claims to be based on a recently discovered manuscript written by the hero of Jules Verne's Around the World in Eighty Days. This manuscript tells a distinctly different version of the events that Verne recorded. Instead of a wealthy

dilletante with a taste for odd wagers, Phileas Fogg is an agent of an alien race who have been conducting a secret war on earth for years. His race around the world is part of this arcane war generally designed to help ferret out Fogg's nemesis: Captain Nemo. This premise alone should give you a feel for the book. Farmer doesn't work in quite so many literary references as *Anno Dracula* does but he does a great job of weaving his story into the interstices of Verne's novel and inventively "explains" a lot of oddities in the earlier book. He also manages to work in real life mysteries of the time such as the *Mary Celeste*. The book has a great pulp adventure feel involving secret wars, classic characters, and teleporting watches. There's also an essay in the back which dissects Nemo's character (with an aim towards refuting the idea the speculation that Nemo was a heroic Indian freedom fighter). It also advances the highly original notion that Captain Nemo is none other than Professor Moriarty.
