Essential for anyone involved with the built environment.

By A Customer

Have you ever been enthralled with those thick, illustrated books that line the shelves of every architect's office? This isn't one of them...its sitting open next to their cad station. I have few books that have followed me from college into practice, but this revised edition has assisted the design development of many residential projects and earned me high marks with my project managers.

I was a student of J. Panero

By A Customer

I was a student of J. Panero at FIT in NYC in 1975. He and Martin Zelnick were wonderful professors. I was around when they were putting together their first book and was glad to see this one. Keep up the good work

Hard to read

By Triple Mommy Architect

I am a little disappointed from this Time-saver version. I have gotten nothing but positive things to say about other Time-savers, so I just went ahead with this one. The pictures are so hard to read. The drawings look so tired and a bit messy at times. However, if this is the only option you have, then go for it. There are definitely a lot of information in this book on mid to high density housing development plans.
