Michael Peterson Was Driven To Succeed.

An army brat-turned-marine, he saw combat in Vietnam, and returned a decorated soldier. An avid reader, his dreams of being an acclaimed novelist came true. His desire to find love was fulfilled when he married brilliant executive Kathleen Atwater, the first female student accepted at Duke University's School of Engineering. The Petersons seemed the ideal academic couple- well-respected, prosperous, and happy.

And Compelled To Kill.

All that came crashing down in December of 2001, when Kathleen apparently fell to her death in their secluded home in an exclusive area of Durham, North Carolina. But blood spattered evidence and a missing fireplace poker suggested calculated, cold-blooded murder. Her trusted husband stood accused. Prosecutors introduced evidence at trial that sixteen years earlier, Peterson was one of the last people to see his neighbor alive before she was found dead at the bottom of a staircase in her home in Germany. A dramatic trial followed in the explosive final chapter of a life that no novelist could ever have conceived...

On the edge of your seat....

By true crime addict!!

As always Diane does an excellent job of researching and retelling the scope of events. At the end it is so poignant when she visits Kathleen's grave. Don't miss out on this "must read."

More informative than the documentary.

I did not want to read this after seeing the documentary, but I am very glad I did. It did not focus so much on Peterson's sexual orientation but on the facts. Very well written. Peterson is right where he needs to be, locked up.

Mixed verdict

By Milton Mankoff

I became interested in this case after watching the documentary on the Sundance channel this April. I came away from that believing that I would have acquitted Peterson on the basis of reasonable doubt even though I thought it POSSIBLE he was responsible for his wife's death. I decided to read Fanning's book to deepen my knowledge of the case and understand why the jury acted as they did.

Fanning's book certainly provides information that the documentary ignored...no need to itemize here and ruin a good read. The net effect was to move me towards believing that Peterson was PROBABLY responsible for the death. At the same time i don't believe he

initially intended to kill her, but that his probable actions(assault) or inactions

(letting her bleed to death) emerged after recognition that his

probably assault (he seemed to have a hair-trigger temper) went too far and that his marriage would not survive it and he would be

unable to live in manner he had become accustomed to if she left him as a result of it.

Fanning, however, even with occasional demurrals, writes as if he

planned to kill his wife that night and wholly accepts the prosecution belief that his bisexual adventures negated his love for his wife, ignoring social science evidence that very few male adulterers commit adultery (heterosexual or homosexual)because they no longer love their spouses. She also accepts the likelihood that he premeditated killing for financial GAIN, when his wife was, in fact, likely to be worth far more alive than dead because of her great earning potential...even if her current job was in jeopardy because of the fate of her

employer in the current market. His income GAIN would be shortlived , given the couple's debts, and his earning power as a writer, while considerable, was sporadic.

Beyond this disagreement about the interpretation of the case Fanning exhibits some annoying habits that prevents this from being a far better book:

1) she imputes states of mind to persons that she couldn't possibly know...wife is dead and Mike Peterson

didn't discuss his thoughts with Fanning

2) exhibits a double-standard in describing and characterizing

prosecution and defense work...both are simply doing their respective jobs under existing rules...if defense experts are paid, prosecution ones are typically state employees who don't have to be compensated above their salaries...

3) making silly psychological observations....Peterson didn't suffer from writer's blocker after death of wife as a sign of his guilt because stressed out, grieving widower would...people handle stress in all sorts of DIFFERENT ways. Some become workaholics.

4) relying on dumb psychiatric diagnoses.."narcissistic personality disorder" which sound meaningful but have the same value as "loving dark chocolate personality disorder" ...simply describing behavior not an underlying medical condition that

produces behavior symptoms. Besides, Peterson had exhibited lots of different behaviors in his life and not all were narcissistic.

She is very selective in viewing data.

5) an awareness and yet denial that our court system is based on an adversarial relationship and not a search for truth. jurors could have easily created a hung jury and were deeply divided initially. outcome of jury deliberations often hinges on personalities, group dynamics, leadership roles, demographics.

had the jury hung would she have written the book the same way?

these problems, which readers should keep in mind while reading the book, are worth mentioning because those same readers may be jurors some day and apart from that may be reacting to other trials which receive much attention...the Michael Jackson one, for example, where his admittedly peculiar nature may trump weak evidence and work against him.
